

ZTIPS-60W

Network Column Speaker

Description

The ZTIPS-60W network column speaker is a fully digital network analog-to-digital converter with high-fidelity speaker based on TCP/IP transmission protocol, which realizes a modern network playback terminal with integrated processor and column speaker. It can be attached anywhere the network can arrive. The remote audio data stream can output audio signals through the unit and directly emit sound from the column speaker with intelligent control of the host

Features

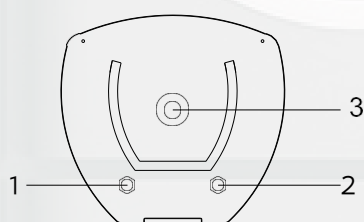

- All-weather design and waterproof unit, suitable for indoor and outdoor application; long service life, high sensitivity ($90\pm 2\text{dB}$), clear and bright sound;
- The maximum sound pressure level is $105\pm 2\text{dB}$, and the effective frequency range is as wide as $80\text{Hz} \sim 16\text{kHz}$;
- Can be attached anywhere the network can arrive;

- Support up to 48kHz sampling rate 16bit digital audio stream decoding;
- Built-in 1x60W digital amplifier, with low power consumption;
- Can play background music, emergency paging, alarm signals from the system host;
- Aluminum mesh, no rust;
- Two-way structure, wide frequency band;
- Waterproof grade IPX6 with waterproof structure

SPECIFICATION

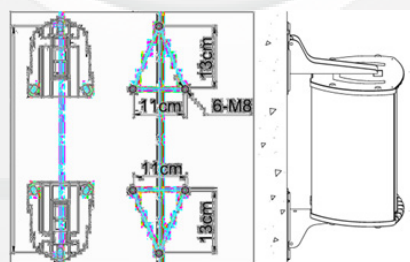

Model	ZTIPS-60W
Acoustic System	Driver Unit
	Sensitivity(1m,1W)
	Max.SPL(1m)
	Freq. Resp.
	Rated Power (RMS)
	Freq. Resp.
	Distortion
	SNR
NET Play	Power Supply
	Package Dimension (L×W×H mm)
	Machine Dimension (H×W×L mm)
	Gross Weight
	Net Weight

Product Information

1. Network interface
Connected to the network cable.
2. AC220V power input
3. Mounting hole

Installation Diagram

Installation Method

1. Select an appropriate position on the facade where the column speaker is to be installed, install the six M8 expansion bolts as shown above, attach the bracket, and fix the column speaker;
2. Connect to the power cord and network cable;
3. Adjust the angle of the column speaker and check if the installation is firm and reliable.
