

ZTS-M84

Features

- **Versatile Input Configuration:** 8-channel mixer featuring 4 microphone inputs and 2 stereo inputs.
- **Advanced DSP Effects:** Built-in 36 kinds of DSP effects, offering performance comparable to the popular X5 effect processor.
- **Media & Connectivity:** High-quality USB music player with seamless Bluetooth connection and an MP3 large-screen player.
- **Dual Display System:** High-quality dual display setup for intuitive monitoring of MP3 playback and DSP effects.
- **Precision Audio Control:** Double 7-stage (band) graphic equalization for precise frequency shaping and sound tuning.
- **Flexible Routing:** Two groups equipped with independent outputs for versatile connection options, plus 2 auxiliary transmitters (sends) for easy external equipment expansion.
- **Professional Hardware:** Equipped with 60mm long-life, high-resolution faders (pushers) for smooth control, and a single +48V Phantom power switch for condenser microphones.
- **Ultra-Low Noise:** Powered by an external lossless power supply designed to significantly minimize background noise and electrical interference.

Description

This 8-channel professional audio mixing console is engineered to deliver exceptional sound quality and versatile routing capabilities. Ideal for live performances, studio recording, and complex audio setups, it features robust inputs, built-in advanced DSP processing, and modern media playback options. The external lossless power supply ensures ultra-low background noise, providing pristine audio clarity for any professional application

Specification

Model	ZTS-M84
Total Channels	8 Channels
Inputs	4 Mic Inputs, 2 Stereo Inputs
DSP Effects	36 Types (X5 Comparable)
Equalization	Double 7-Stage EQ
Faders	60mm High-Resolution
Phantom Power	+48V (Single Switch)
Media Player	USB / MP3 / Bluetooth
Displays	Dual High-Quality Displays
Auxiliary Sends	2 Aux Transmitters
Group Outputs	2 Independent Groups
Power Supply	External Lossless Power Supply
